

Simplilearn FullStack Java Developer FlyAway (An Airline Booking Portal).

<https://github.com/azamkhan11>

Core Libraries:

MariaDB

Hibernate

JSP/Servlet/HTML

Description:

FlyAway is a ticket-booking portal that lets people book flights on their website. The FlyAway portal allows customer to search form in the homepage to allow entry of travel details, like the date of travel, source, destination, and the number of persons.

Sprint 1:

- Clarify the specification and requirements
- Implement Functionality to Search for Flights
- Add Travel details like date, destination and number of persons
- Show the available flights with their ticket prices

Sprint 2:

- Admin Login page & change password
- A master list of places and destination
- A master list of airlines
- A list of flights
- Documentation

Documentation of the Functionality:

Here will be introduced the different options of the program

LoginPage:

FlyAway

User Login

Email	<input type="text"/>
